

DIMENSION ONE SPAS®

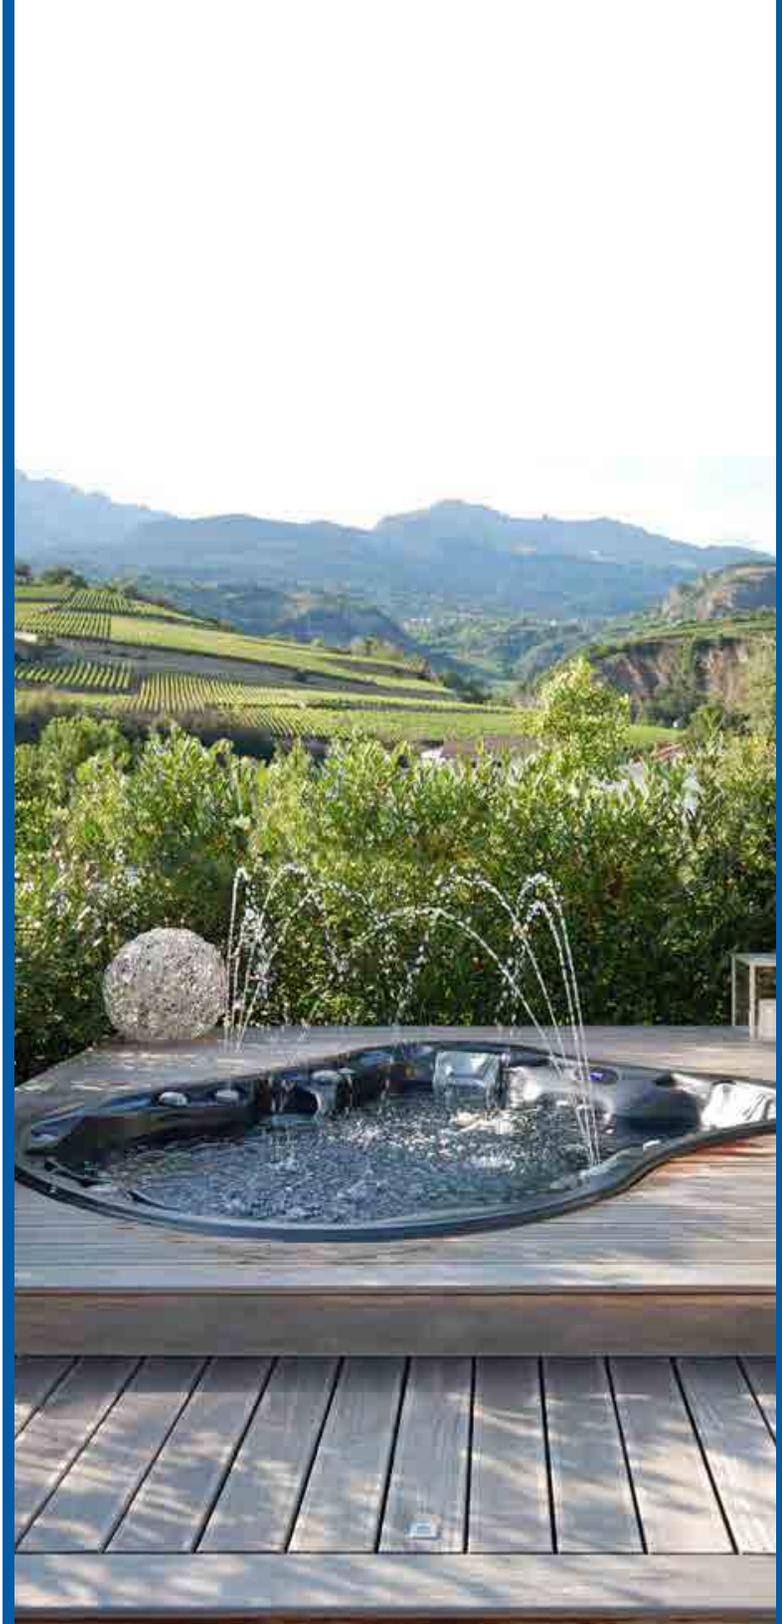

35 years of excellence

The Difference is Everything

The perfect greeting to a long, hard day is waiting for you when you come home — a spa that has everything you could ever want — cutting edge design, performance and value.

At Dimension One Spas, the difference isn't just one thing, it's in everything we do. From the way we build our spas, to your experience, to the care your spa will give you for years to come, our passion is for you to lead a happier, healthier life.

Welcome home.

Passion • Integrity • Care

The Difference is Clear

The most important feature in your hot tub is the water. If it's not crystal clear and ready to use, nothing else matters. That's why clean, healthy water is the foundation for all of Dimension One's advanced hydrotherapy designs. Enjoy the cleanest water in the industry that is so easy to maintain, you'll feel like your hot tub is taking care of you.

Peace of Mind

Not all ozone systems are created equal.

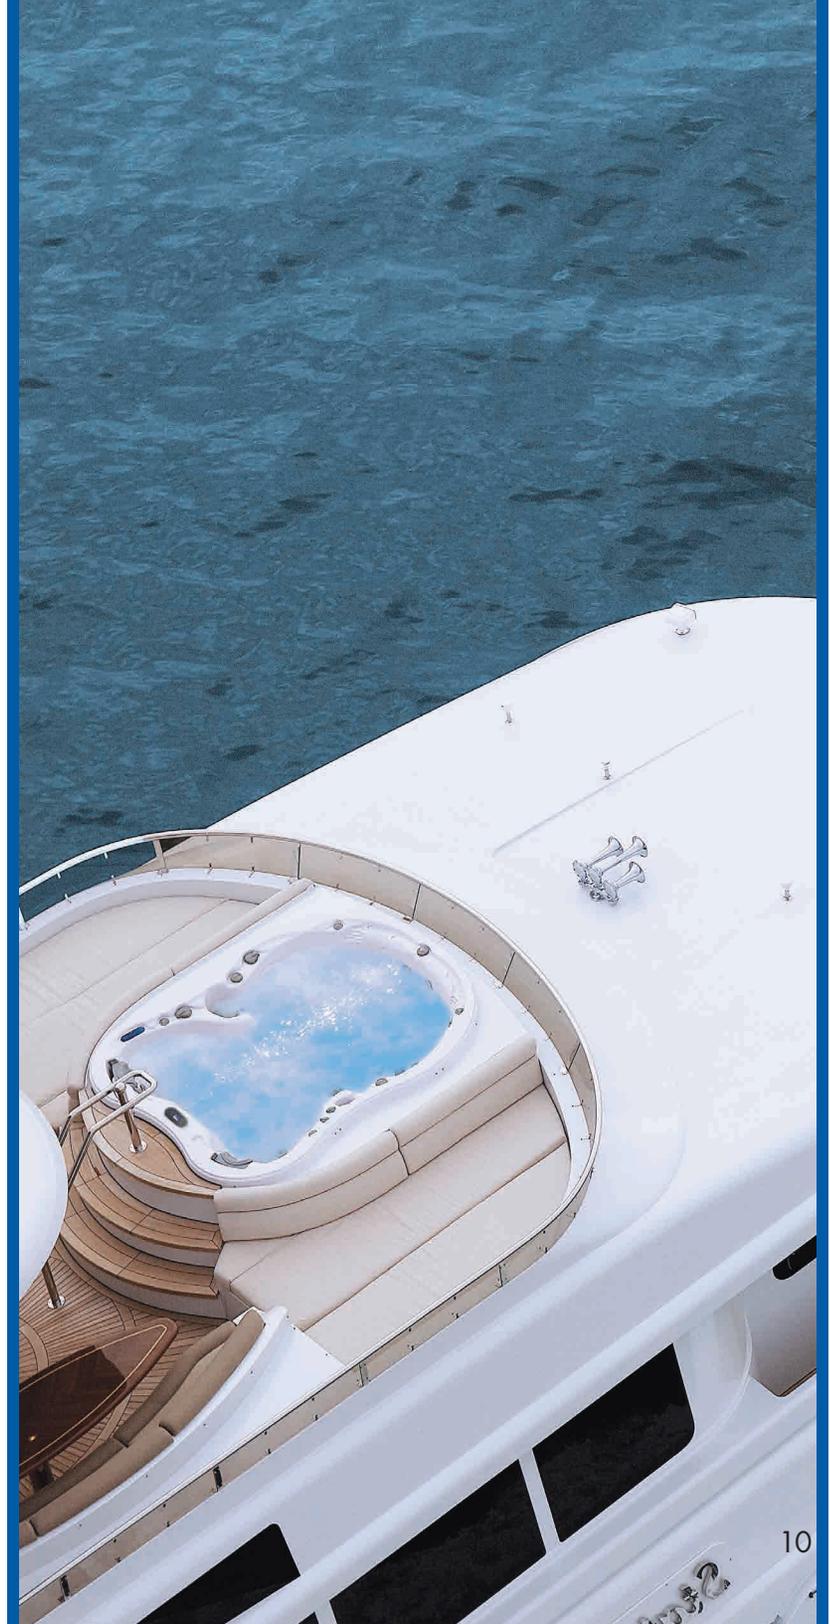

Ozone is a natural, oxygen-based system that significantly reduces the need for chemicals. Most hot tub manufacturers use ozone as their top-of-the-line sanitizer today, but that's old news for D1, who pioneered the use of ozone with **ClearZone**® in 1988. Today, D1 uses **ClearZone**® **PRO** on the @home® Collection which fights and oxidizes impurities 47% more efficiently than standard ozone systems.

D1 improved this industry standard with the patented **UltraPure**™ system. This dedicated hot tub filtration system mixes ozone and water three times to ensure ozone comes in contact with every drop of water, providing the purest water possible, 24 hours a day.

UltraPure™ **PLUS** builds on the **UltraPure**™ system by introducing ultraviolet light to the equation. Together, ozone and UV light are the most effective system available. UV light comes in contact with eight gallons of water per minute, meticulously neutralizing any remaining impurities.

Limit the amount of time you spend on water maintenance while also saving on chemical use and cost. D1's patented systems give you ultra-clean, crystal-clear water and peace of mind.

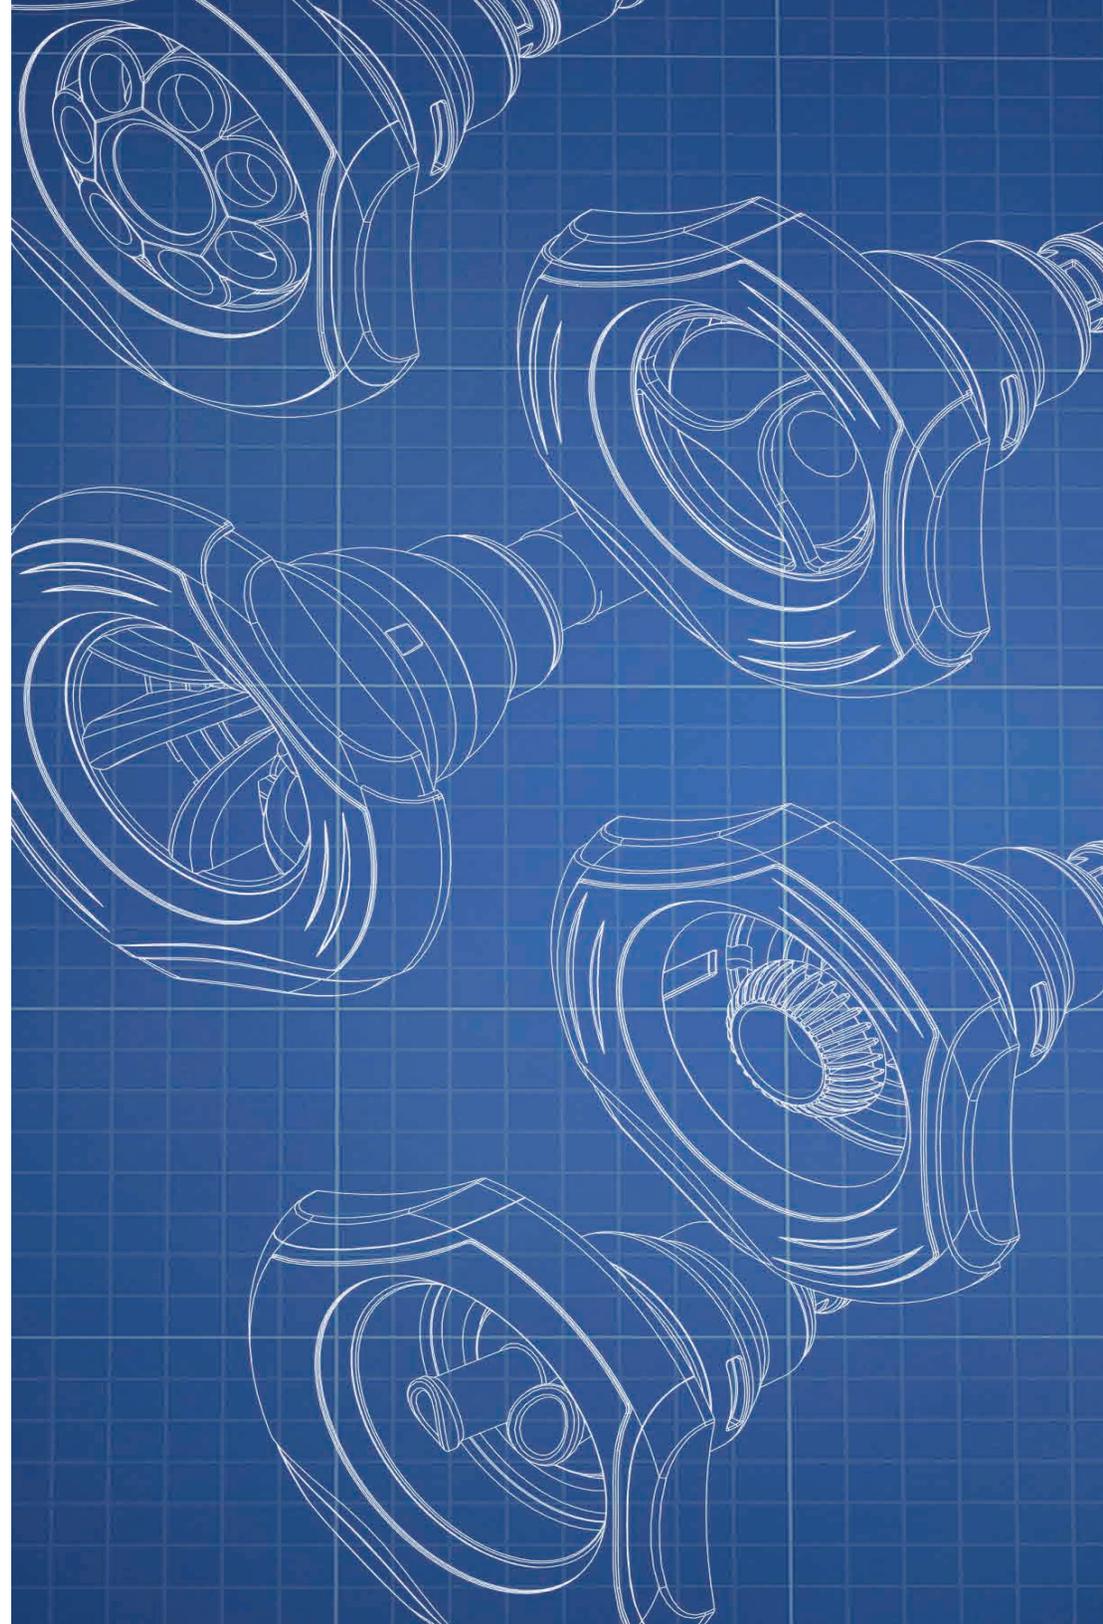

You won't find cleaner water anywhere else.

The Difference is Impact

Different muscles need different types of massage pressure, which is why you'll find a variety of powerful hydrotherapy jets in every Dimension One spa.

Our patented accent jets give you the power to completely customize your massage. Interchange jets with a simple spin motion and adjust each individual nozzle to control massage pressure. Then sit back and enjoy a relaxing hydrotherapy experience.

Powerful Pumps

D1 uses powerful massage jet pumps, expertly engineered and plumbed for 100% efficiency. Experience the highest power pump with the lowest energy usage that also extends the life of your spa.

Jet Therapy Pillow™

The Jet Therapy Pillow™ provides you with the only adjustable neck and shoulder massage system in the industry. With multiple positions to choose from, you can get a full-featured massage that adjusts to you. The Jet Therapy Pillow™ also features powerful, user-adjustable jets, placed in a curved, padded head cradle for ergonomic support.

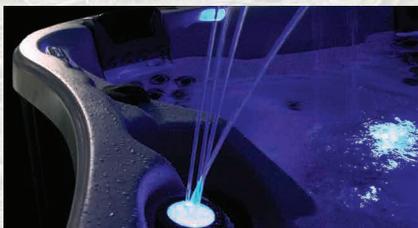

The Difference is Excellence

We have been creating the most beautiful, highly-engineered and energy efficient spas in the industry for more than 35 years.

Liquid FX™

Liquid FX™ features a calming interplay of light, sound and shadow through the use of fountains and exquisite lighting effects to set the perfect mood.

Exterior Lighting

We believe the exterior lighting of your spa is just as important as the interior. That's why there are optional LED lights placed around your tub's exterior to enhance your outdoor living space when relaxing or entertaining.

Status Light

Managing your spa is easy with the optional Status Light. This integrated system illuminates the outside of your spa with Dynamic L.E.D. Lighting and displays a light to indicate the status of your spa.

Integrated Bluetooth® Stereo

With the ability to pair up to eight devices, you can equip your hot tub with an optional audio package featuring a Bluetooth®-enabled sound system and high-quality speakers.

Superior Efficiency

Years of testing has shown us that the best way to keep your energy costs low is to fully insulate your spa. Full foam also aids in your spa's quiet operation. Every spa we make is certified and exceeds the California Energy Commission's requirements.

Smart Heat

Dimension One uses the most durable and reliable spa heater on the market. The output on this titanium heater provides optimal heat recovery and consumes a very low amount of energy. Unlike other hot tubs, it also allows for your heater and jets to run independently.

Green Durability

Built from durable, all-weather material including post-consumer-recycled milk cartons, EnviroTect™ is the most environmentally friendly skirting material available today. It requires no waterproofing or staining and will last for many years to come without wearing or fading. It has a lifetime warranty and is available in tan, brown or gray.

Unmatched Beauty

The natural wood tones of the Terracina™ Collection create a realistic beauty unmatched in a hot tub exterior. Enjoy nature without the work for years to come. In your choice of Cherry, Summer Pine, Driftwood Gray, Midnight Maple, or Vintage Cedar.

The Difference is Intelligence

Thirty-five years of experience has taught us that independent systems are the key to an intelligent hot tub. From the intuitive D1 Hub™ to the ultra-relaxing massage sequencer to the convenient Echo™ magnetic switch, your D1 hot tub is fully capable of taking care of you. Enjoy the perfect combination of beauty and brains.

D1 Hub™

The D1 Hub™ features a simple control panel with color screen and integrated Bluetooth® that makes using your hot tub easy.

Dynamic Massage Sequencer

D1's underwater massage chair. Choose from many automated massage sequences that instantly turn an ordinary hot tub soak into a full-body hydrotherapy experience.

Echo™

D1's exclusive magnetic switch gives you fingertip control of your hot tub's major functions without moving your hands out of the warm, comfortable water.

The Difference is Forever

We are proud to offer the longest and most inclusive warranty in the industry. Unlike common sliding scale warranties that decrease every year and cover limited parts, D1 offers a longer warranty that gives you the same coverage as the day you purchased it.

D1's exclusive UltraLife® shell and EnviroTect™ skirting both have a lifetime warranty. EnviroTect stands the test of time requiring no waterproofing or staining and is exceptionally resistant to moisture, fading, insects, splintering, warping or other wear. UltraLife® features an unmatched slip resistant material, is the most durable shell in the industry and is so comfortable that you'll want to soak as often and as long as possible.

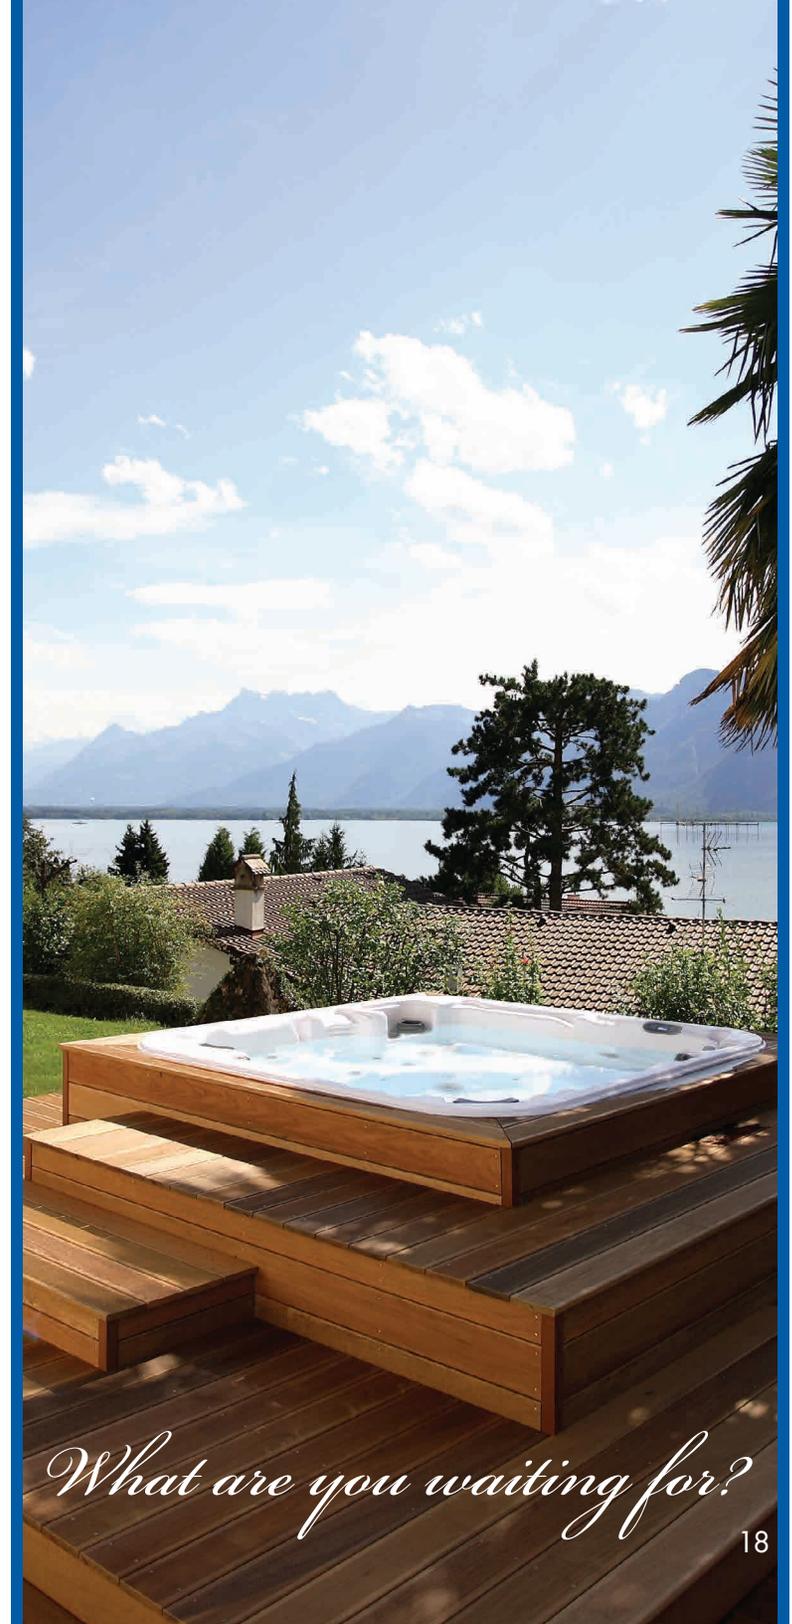

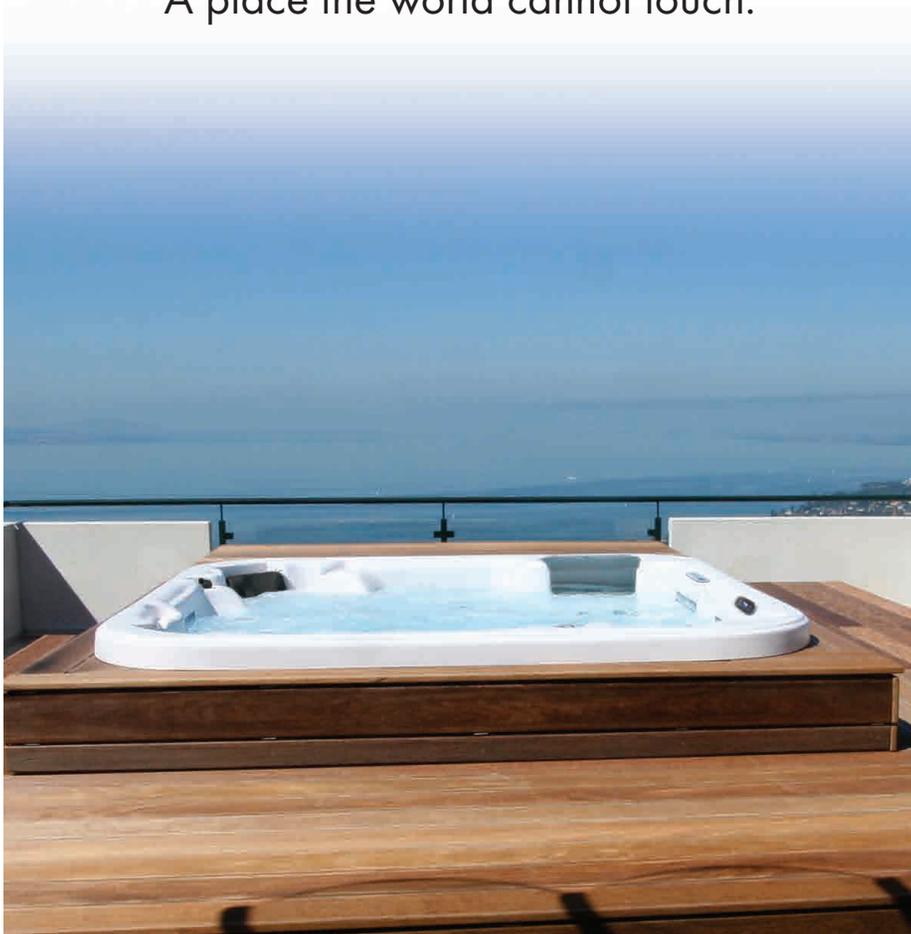

A soothing sanctuary

A private retreat

A place for intimacy

A place for fun

A place the world cannot touch.

What are you waiting for?
